

Beck Bond Construction Chemicals

Waterproofing PRODUCT PROFILE

Trade designation	Mixing ratio R : H (Parts by wt)	Viscosity of mixture at 25°C (mPa.s)	Pot life (..C/..min)	Distinctive Properties	Suggested Applications
Beck Bond WEP 31	100 : 300	25 - 20	30/60	Waterbased epoxy primer	Wall and terrace waterproofing
Beck Bond WPC 30	-	Paste	-	a white, elastomeric, High Build Coating for waterproofing of old and new built up roofs	Roof slabs, terraces, balconies, chajjas, parapet walls, Old and new surfaces, Vertical as well as horizontal surface, structures having complicated geometry like domes, arches, shells, folded plates, parabolides, corrugated sheets etc. Structures exposed to marine or saline atmosphere
BeckProof WAC	100 : 200 (Chemical : Cement)	200-600	25 /15-20	an acrylic based polymer modified cementitious coating system. a milky white liquid, which in combination with cement has excellent waterproofing and protection properties.	Waterproofing terraces, balconies and terrace gardens, To stop leakages from toilet units and sunken slabs. Water proofing damp walls, Arresting leakages in Storage tanks and reservoirs. Waterproofing of chajjas & Canopies. Providing protection to exposed reinforcement and general concrete repairs.
Beck Bond Aquaproof	0.2 to 0.25 % by weight of cement	-	-	Integral waterproofing Admixture for concrete	For structural concrete of water retaining structures, Slabs, sunk slabs,
ADDITIVES & AUXILIARIES					
Diluent C	-	65	-	Reduces viscosity, gives flexibility to cured film	Diluent and viscosity reducer
Thinner 221	-	-	-	-	Viscosity reduction of coating system, cleaning of tools etc.
